

Dear FCC,

I am writing to urge you to reject the National Association of Broadcasters' petition 04-160, which seeks to limit the ability of satellite radio companies to provide locally oriented content, including weather and traffic information, to their subscribers.

I subscribe to XM radio because I'm dissatisfied with the lack of programming variety available in the current commercial radio market. We do not need additional regulation to further limit the choices we have.

Sincerely,

John Hutchins
